SUMMARY

Software Development graduate with hands-on experience building, testing, debugging, and deploying full-stack applications, REST APIs, and database-driven systems using JavaScript, TypeScript, Node.js, React.js, and MongoDB. Experience with Git, AWS, Docker, CI/CD, authentication, API integration, technical documentation, and Agile/Scrum development. Recently completed a professional certificate in Generative AI and Agents for Software Development, with experience using Claude Code, LLM APIs, and AI-assisted development workflows to accelerate software development. Strong problem-solving and self-learning abilities with a focus on rapidly understanding requirements, building solutions, testing implementations, and improving existing software.

EDUCATION

Honours Bachelor of Technology - Software Development <i>Seneca Polytechnic of Applied Arts and Technology – Toronto, ON</i>	<i>Jan 2021 – Aug 2025</i>
Professional Certificate in Generative AI and Agents for Software Development <i>University of Texas – Austin, TX</i>	<i>May 2026 – Sep 2026</i>

WORK EXPERIENCE

Development Intern <i>Human City – Toronto, ON</i>	<i>Jan 2025 – Apr 2025</i>
--	----------------------------

- Improved front-end load performance by 20%, as measured by page render speed, by rebuilding the site into a hybrid web application and applying web performance optimization techniques using React components, NPM dependencies and application performance.
- Reduced backend response time by 15%, as measured by query execution speed, by modifying MongoDB queries and improving data-layer scalability for a cross-functional service implementation.
- Increased cross-team delivery alignment by 20%, as measured by sprint velocity consistency, by presenting project status updates across teams during daily Agile meetings.
- Reduced post-merge defects by 25%, as measured by fewer flagged issues, by conducting GitHub code reviews, identifying implementation issues, and applying cross-browser compatibility.

System Development Engineer Intern <i>Kubetools Technologies Inc – Brampton, ON</i>	<i>May 2024 – Aug 2024</i>
---	----------------------------

- Improved front-end build performance by 25%, as measured by reduced load times, by applying Git version control to optimize image builds for scalability across environments.
- Increased feature validation coverage by 15%, as measured by successful sprint testing outcomes, by collaborating with engineers to test new features across multiple Git branches, ensuring cross-browser compatibility.
- Improved documentation completeness by 20%, as measured by team onboarding speed, by authoring technical documentation covering feature functionality and third-party API integration points.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Java, C++, C, SQL, HTML/CSS
- **Frameworks & Libraries:** React, React Native, Node.js, Express, pandas, NumPy
- **Cloud & DevOps:** AWS (EC2, S3), Docker, GitHub Actions, CI/CD
- **AI & Data Tools:** Jupyter Notebooks, OpenAI API, Power BI
- **Other Tools:** Git/GitHub, VS Code, Figma, Jira, Agile/Scrum

- **AI/machine learning:** Generative AI, Claude Code, Model Context Protocol (MCP), Gemini API, OpenAI, LangChain, Prompt Engineering
- **Databases:** PostgreSQL, MongoDB, SQL, Firebase
- **Development & Collaboration:** Git, GitHub, Agile/Scrum, Testing, Debugging, SDLC, Vercel
- **Operating System:** Windows

PROJECTS

Churn Analysis	Aug 2026 – Sep 2026
● Delivered clean data and reports using Microsoft SQL Server Management Studio, using Microsoft Power BI, and integrating Python libraries for data analysis. ● Cleaned and transformed records using Microsoft SQL Server, writing SQL queries to prepare raw customer data for analysis and KPI reporting. ● Performed exploratory and statistical analysis using Python, pandas, NumPy, Matplotlib, Seaborn, and scikit-learn to identify correlations, churn patterns, and factors associated with customer attrition. ● Transformed analytical results into visual reports and insights, enabling comparisons of churn trends across customer demographics, services, contracts, and tenure groups.	
DevAnswer	May 2026 - Sep 2026
● Delivered a fully responsive, cross-browser compatible application by building the front end in React.js, Vite, Redux Toolkit, and React Bootstrap; and the backend using Express, Mongoose REST API. ● Integrated Artificial Intelligence into the application using Gemini API for smart summarizing and question editing.	
Personal E-Portfolio Website	Oct 2025 - Dec 2025
● Delivered a fully responsive, cross-browser compatible portfolio site, as measured by consistent rendering across desktop, tablet, and mobile devices, by building the front end in React.js with a Node.js/Express.js backend. ● Enabled reliable contact form functionality, as measured by successful submission handling, by integrating REST APIs for form data processing and optimizing page load performance.	
Bike Store (Capstone Project)	Feb 2024 - Oct 2024
● Delivered a scalable, production-ready REST API platform, as measured by successful deployment on Vercel, by developing the service in Node.js and MongoDB with role-based authentication via JWT. ● Achieved consistent, error-free deployments, as measured by pipeline success rate, by implementing automated CI/CD pipelines through GitHub Actions.	
N.E.A.R Security Alert App	Feb 2024 – Mar 2024
● Implemented a Responsive-User Application using React Native by replicating the UI/UX design from Figma designed by team members. ● Achieved authorization for registration and log in features to include usernames and password in the Firebase storage.	

ACHIEVEMENTS

Seneca Hackathon Finalist	Mar 2024 – Apr 2024
<i>Seneca Polytechnic of Applied Arts and Technology – Newnham, ON</i>	

PROFESSIONAL DEVELOPMENT

AI Connect – AI-Focused Event	October 2026
<i>Skills For Change – Toronto, ON</i>	
● Attended an interactive generative AI event focused on AI engineering and prompt-related practices.	
● Explored perspectives on how generative AI can support everyday tasks, personal routines, and changing workplace needs.
