Lwin Mateo Lopez

Toronto, ON · (647) 287 -5713 · lwinyonal@gmail.com · LinkedIn · GitHub

SUMMARY

Software Development graduate with hands-on experience building, testing, debugging, and deploying full-stack applications, REST APIs, and database-driven systems using JavaScript, TypeScript, Node.js, React.js, and MongoDB. Experience with Git, AWS, Docker, CI/CD, authentication, API integration, technical documentation, and Agile/Scrum development. Recently completed a professional certificate in Generative AI and Agents for Software Development, with experience using Claude Code, LLM APIs, and AI-generated code using the Software Development Life Cycle (SDLC). Strong problem-solving and self-learning abilities with a focus on rapidly understanding requirements, building solutions, testing implementations, and improving software reliability.

EDUCATION

Honours Bachelor of Technology - Software Development *Jan 2021 – Aug 2025*
Seneca Polytechnic of Applied Arts and Technology – Toronto, ON

Professional Certificate in Generative AI and Agents for Software Development *May 2026 – Sep 2026*
University of Texas – Austin, TX

WORK EXPERIENCE

Development Intern *Jan 2025 – Apr 2025*
Human City – Toronto, ON

- Improved front-end load performance by 20% by rebuilding the website as a hybrid web application using React components and web performance optimization techniques.
- Reduced backend response time by 15% by optimizing MongoDB queries and improving data-layer performance, contributing to more API operations.
- Identified and resolved frontend defects through GitHub code reviews and cross-browser testing, improving application reliability and reducing post-merge issues by 25%

System Development Engineer Intern *May 2024 – Aug 2024*
Kubetools Technologies Inc – Brampton, ON

- Increased feature validation coverage by 15%, as measured by successful sprint testing outcomes, by collaborating with engineers to test new features across multiple Git branches, ensuring cross-browser compatibility.
- Improved documentation completeness by 30%, as measured by team onboarding speed, by authoring technical documentation covering feature functionality and third-party API integration points.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Java, C++, C
- **Web Technologies :** HTML5, CSS3, JavaScript, DOM
- **Frameworks:** React, React Native, Node.js, Express
- **Software Development & Testing:** Object-Oriented Programming (OOP), Data Structures and Algorithms, SDLC, Requirements Analysis, REST APIs, Unit Testing, Automated Testing, Debugging, Code Reviews, Git Branching
- **Cloud & DevOps:** AWS (EC2, S3), Docker, GitHub Actions, CI/CD, Vercel

- **Databases:** Microsoft SQL Server, PostgreSQL, MongoDB, Firebase
- **AI & AI-Assisted Development:** Generative AI, Claude Code, Model Context Protocol (MCP), Gemini API, OpenAI, LangChain, Prompt Engineering
- **Development Tools & Methodologies:** Git, GitHub, VS Code, Figma, Jira, Agile/Scrum, Sprint Planning

PROJECTS

Churn Analysis | GitHub Aug 2026 – Sep 2026

- Delivered clean data and analytical reports by querying data with Microsoft SQL Server Management Studio, building visualizations in Power BI, and applying Python libraries for data analysis.
- Performed exploratory and statistical analysis using Python, pandas, NumPy, Matplotlib, Seaborn, and scikit-learn to identify correlations, churn patterns, and factors associated with customer attrition.
- Transformed analytical results into visual reports and insights, enabling comparisons of churn trends across customer demographics, services, contracts, and tenure groups.

DevAnswer | Live Demo | GitHub *May 2026 - Sep 2026*

- Delivered a fully responsive, cross-browser compatible application by building the front end in React.js, Vite, Redux Toolkit, and React Bootstrap.
- Integrated microservices, controllers, error handling and a REST API for the backend service.
- Integrated artificial intelligence into the application using Gemini API for question summarization and editing.

Personal E-Portfolio Website | Live Demo *Oct 2025 - Dec 2025*

- Delivered a fully responsive, cross-browser compatible portfolio site, as measured by consistent rendering across desktop, tablet, and mobile devices, by building the front end in React.js with a Node.js/Express.js backend.
- Enabled reliable contact form functionality, as measured by successful submission handling, by integrating REST APIs for form data processing and optimizing page load performance.

Bike Store (Capstone Project) | Live Demo | GitHub *Feb 2024 - Oct 2024*

- Developed and deployed a REST API platform using Node.js and MongoDB, implementing role-based authentication with JWT and deploying the application through Vercel.
- Implemented automated CI/CD pipelines through GitHub Actions to automate application builds and deployments.

N.E.A.R Security Alert App | GitHub *Feb 2024 – Mar 2024*

- Implemented a responsive mobile application using React Native by translating team-designed Figma UI/UX designs into functional application screens.
- Implemented user registration and login functionality using Firebase Authentication and user credentials.

ACHIEVEMENTS

Seneca Hackathon Finalist *Mar 2024 – Apr 2024*

Seneca Polytechnic of Applied Arts and Technology – Newnham, ON

PROFESSIONAL DEVELOPMENT

AI Connect – AI-Focused Event *October 2026*

Skills For Change – Toronto, ON

- Attended an interactive generative AI event focused on AI engineering and prompt-related practices.
