## SUMMARY

---

Software Development graduate with practical experience using AI agents and AI development tools to develop, debug, test, and deploy a responsive web application. Proficient in HTML5, CSS3, JavaScript, React, SQL, and REST APIs/JSON, with experience developing scalable, cross-browser-compatible applications and integrating third-party services. Strong foundation in software engineering principles, SDLC practices, problem-solving, and collaborative development, with experience contributing to application development from implementation and testing through deployment.

## EDUCATION

---

### Seneca Polytechnic - Honours Bachelor of Technology, Software Development

Newnham, ON, Canada - Jan 2021 - Aug 2025

### University of Texas - Professional Certificate Program in Generative AI and Agents for Software Development

Austin, TX, USA - May 2026 - Sep 2026

## WORK EXPERIENCE

---

### Human City - Development Intern

Toronto, ON, Canada - Jan 2025 - Apr 2025

- Improved front-end load performance by 70%, as measured by page render speed, by rebuilding the site into a hybrid web application and applying web performance optimization techniques using React components and NPM dependencies.
- Reduced backend response time by 15%, as measured by query execution speed, by modifying MongoDB queries and improving data-layer scalability for a cross-functional service implementation.
- Increased cross-team delivery alignment by 20%, as measured by sprint velocity consistency, by presenting project status updates across teams during daily sprint meetings.
- Reduced post-merge defects by 45%, as measured by fewer flagged issues, by leading code reviews on GitHub, enforcing cross-browser compatibility standards, and coordinating team communication through Slack.

### Kubetools Technologies Inc. - System Development Engineer Intern

Brampton, ON, Canada - May 2024 - Aug 2024

- Improved front-end build performance by 25%, as measured by reduced load times, by applying Git version control to optimize image builds for scalability across environments.
- Increased feature validation coverage by 15%, as measured by successful sprint testing outcomes, by collaborating with engineers to test new features across multiple Git branches, ensuring cross-browser compatibility.
- Improved documentation completeness by 5%, as measured by team onboarding speed, by authoring technical documentation covering feature functionality and third-party API integration points.

## TECHNICAL SKILLS

---

- **Programming Languages:** C, C++, JavaScript, SQL, Python, Java, TypeScript
- **Microsoft Technologies:** Visual Studio, Visual Studio Code, Excel

- **Microsoft Office:** Word, Excel, PowerPoint
- **Frontend:** React, Next.js, React Native, HTML5, CSS3, Responsive Design, Cross-Browser Compatibility
- **Backend:** Node.js, Express, Django, REST API Development, JWT, Microservices, Authentication and Authorization, JSON
- **Cloud and DevOps:** Containerization, AWS (EC2, S3, AWS Lambda, Load Balancer), GitHub Actions, Continuous Integration / Continuous Deployment, Performance Optimization, Scalability
- **Mobile:** React Native, Expo
- **RDBMS and Tools:** Microsoft SQL Server Management Studio 18, PostgreSQL
- **Reporting Tools:** Power BI
- **AI:** GitHub Copilot, Claude Code, OpenAI API, Gemini, LangChain, Google Gen AI

## PROJECTS

---

### Churn Analysis - Aug 2026 – Sep 2026

- Delivered clean data and reports using Microsoft SQL Server Management, using the Microsoft Power BI, and integrating Python libraries for data analysis.

### DevAnswer – May 2026 - September 2025

- Delivered a fully responsive, cross-browser compatible application by building the front end in React.js, Vite, Redux Toolkit, and React Bootstrap; and the backend using Express, Mongoose REST API.
- Integrated Artificial Intelligence into the application using Google Gen AI for smart summarizing.

### Personal E-Portfolio Website - Oct 2025 - Dec 2025

- Delivered a fully responsive, cross-browser compatible portfolio site, as measured by consistent rendering across desktop, tablet, and mobile devices, by building the front end in React.js with a Node.js/Express.js backend.
- Enabled reliable contact form functionality, as measured by successful submission handling, by integrating REST APIs for form data processing and optimizing page load performance.

### Fragments Microservice Project - May 2025 - Aug 2025

- Delivered a scalable, production-ready REST API platform, as measured by successful deployment on AWS EC2, by developing the service in Node.js and PostgreSQL with role-based authentication via Amazon Cognito (third-party service integration).
- Achieved consistent, error-free deployments, as measured by pipeline success rate, by implementing automated CI/CD pipelines through GitHub Actions.

## ACHIEVEMENTS

---

Seneca Polytechnic - Seneca Hackathon Finalist

*Newnham, ON, Canada - Mar 2024 - Apr 2024*

## ADDITIONAL INFORMATION

---

- Hands-on experience with Git version control, branches, and commit changes used in the Windows operating system.
- Basic experience with scripting using SQL and Python in Windows, macOS, and Linux environments.
- Experience in reviewing and debugging code problems.
- Experience with dashboards in Power BI
